# DerFlipper

**Stand up and change  
the way you work**

New ideas and innovation appear in work-environments where you can combine work and creativity in a sensible manner. DerFlipper supports this vision by offering the opportunity to be used as a whiteboard, standing table and playable. This allows to take different perspectives on new ideas.

## How does DerFlipper change the working world?

To develop new ideas there has to be an open culture towards new things. Thinking out of the box, asking critical questions, prototyping and game storming are several examples. DerFlipper supports that mission by offering several perspectives. He connects people who otherwise only collaborate online. But as we all know, sometimes personal connection and tangible actions like Post-It's or a real drawing is what connects us. With the nexboard from our partner nexenio we remove boundaries between online and offline collaboration and offer new ways of collaboration.

**vertically adjustable**  
for collaboration, sitting and standing

**mobility**  
moves easily through doors and in the elevator

**functional surface**  
writable and magnetic for team brainstormings

**platform for collaboration**  
collaborate with up to 8 people online and offline by combining TheFlipper and nexboard

**adjustable surface**  
for presentation of collaborative working results

**customizable working surface**  
choose freely color and logo
